It's my understanding that the preferred option from the planning officer was to move the container 30 meters into the field to the north of present position
This in my opinion is a total waste of good land ,money and resources as the container has been at this site for over 3 years with no objection from road services or anyone else
The current site integrates into the landscape.
There has been a farm shop facility here for the past 20 on a seasonal basis
I would object most strongly to moving the container 30 meters for very little reason and a lot of cost and hassle incurred
Kind regards
Alan hunter
