1 RECOMMENDATION

- 1.1 That the Committee has taken into consideration and agrees with the reasons for the recommendation set out in section 9 and the policies and guidance in sections 7 and 8 and resolves to **APPROVE** planning permission subject to the condition set out in section 10.

2 SITE LOCATION & DESCRIPTION

- 2.1 The site is located within the existing Ballymoney Town development limits and is identified as being within a major area of existing open space as per NAP 2016. The character of the area is defined by the existing recreational complex which incorporates a number of buildings, pitches and car parking.

- 2.2 The settlement limit defines the boundary of the site to the south, east and west. Housing is located to the north and north east.

3 RELEVANT HISTORY

LA01/2016/0739/F Alterations to existing approval D/2013/0173/F to include alteration of pitch size from 110m x 73m to 101m x 70m. Removal of 12m high floodlighting columns & erection of 15m high floodlighting columns and erection of 9m high catchnets.

Current Application

D/2013/0173/F Construction of New 3G Synthetic Football Pitch and Perimeter Fencing and Construction of New Grass Sand Mattress Pitches.

Approved 05.03.2014

4 THE APPLICATION

- 4.1 Planning permission is sought for alterations to existing approval D/2013/0173/F to include the installation of 6No. 18m high Floodlighting Columns to Perimeter of 3 Small Sided Grass Sand Mattress Pitches.

5.0 PUBLICITY & CONSULTATIONS

5.1 External

There are no objections to this proposal.

5.2 Internal

Environmental Health: No objection subject to condition.

MATERIAL CONSIDERATIONS

- 6.1 Section 45(1) of the Planning Act (Northern Ireland) 2011 requires that all applications must have regard to the local plan, so far as material to the application, and all other material considerations. Section 6(4) states that in making any determination where regard is to be had to the local development plan, the determination must be made in

accordance with the plan unless material considerations indicate otherwise.

6.2 The development plan is:

- Northern Area Plan 2016 (NAP)

6.3 The Regional Development Strategy (RDS) is a material consideration.

6.4 The Strategic Planning Policy Statement for Northern Ireland (SPPS) is a material consideration. As set out in the SPPS, until such times as a new local plan strategy is adopted, councils will apply specified retained operational policies.

6.5 Due weight should be given to the relevant policies in the development plan.

6.6 All material considerations and any policy conflicts are identified in the “Considerations and Assessment” section of the report.

7.0 RELEVANT POLICIES & GUIDANCE

The Northern Area Plan 2016

Strategic Planning Policy Statement (SPPS)

Planning Policy Statement 8: Open Space, Sport and Outdoor Recreation

8.0 CONSIDERATIONS & ASSESSMENT

8.1 The main considerations in the determination of this application relate to Policy OS4 of PPS 8 – Intensive Sports Facilities.

Principle of development

8.2 The site is located within the settlement development limit for Ballymoney as identified in the NAP and is designated as a Major Area of Existing Open Space.

8.3 The principle of the type and scale of development proposed must be considered having regard to the SPPS and PPS policy document specified above.

Policy OS4 of PPS 8 – Intensive Sports Facilities

8.4 The site is identified as a Major Area of Existing Open Space. This application seeks to amend planning permission D/2013/0173/F and erect 6 no. 18m high Floodlighting Columns to the perimeter of 3 small sided grass sand mattress pitches previously approved.

8.5 The proposal meets the first policy test in that the site is within the existing settlement development limit for Ballymoney.

8.6 The policy goes on to state that in all cases the development of intensive sports facilities will be required to meet all of the following criteria:

- *There is no unacceptable impact on the amenities of people living nearby by reason of the siting, scale, extent, frequency or timing of the sporting activities proposed, including any noise or light pollution likely to be generated.*

8.7 The proposal to erect 6 flood lighting columns 18m high around 3no. small pitches. The pitches are located to the south of the site and adjacent to the town development limit. The nearest property is No 16 Bravellen Road approximately 200m away. The site is to the rear of the stadium pitch. There is sufficient separation distance between the proposed flood lightening columns and residential properties so not to cause any adverse impact. Environmental Health have also suggested a condition relating to minimise light pollution from glare and spill.

- *There is no adverse impact on features of importance to nature conservation, archaeology or built heritage;*

8.8 The proposal is located within an existing settlement and within the existing recreation grounds. It will not result in any unacceptable impact on any of these features.

- *Buildings or structures are designed to a high standard, are of a scale appropriate to the local area or townscape and are*

sympathetic to the surrounding environment in terms of their siting, layout and landscape treatment;

8.9 The proposed floodlighting columns are considered appropriate scale within the sports ground.

- *The proposed facility takes into account the needs of people with disabilities and is located so as to be accessible to the catchment population giving priority to walking, cycling and public transport; and*

8.10 This relates to the provision of a new facility and is not considered applicable to the proposed development.

- *The road network can safely handle the extra vehicular traffic the proposal will generate and satisfactory arrangements are provided for site access, car parking, drainage and waste disposal.*

8.11 This relates to the provision of a new facility and is not considered applicable to the proposed development.

9.0 CONCLUSION

9.1 This proposal is considered acceptable in this location having regard to the Area Plan and other material considerations. The proposal relates to a major area of existing open space and is for the erection of flood lighting columns which are of an appropriate scale within a sports centre at this edge of settlement location. The proposal is considered acceptable having regard to the policy guidance set out in PPS 8. Approval is recommended.

10 CONDITIONS

10.1 Regulatory Conditions:

1. As required by Section 61 of the Planning Act (Northern Ireland) 2011, the development hereby permitted shall be begun before the expiration of 5 years from the date of this permission.

Reason: Time Limit.

2. All flood lighting shall be optically controlled and directed in such a manner as to minimise light pollution from glare and spill.

REASON: To protect residential amenity

Informatives

Guidance notes for the reduction of light pollution may be obtained from the Institute of Lighting Engineers. Their website can be accessed at www.ile.org.uk.
